“

ONCE IS NOT ENOUGH
the importance of recycling.

Recycling waste today is still a choice.
Tomorrow it will be a necessity.

For several years now, Govaplast has been proving that a durable
solution for the growing plastic waste stream does exist.

With continuous growth for more than 50 years, global world
plastics production has risen from 1.7 million tonnes in 1950,
to 288 million tonnes in 2012. This is a striking figure...

European production alone accounts for about 57 million tonnes
of this total amount.

25 million tonnes of plastics ended up in the waste stream in 2012
of which 6.6 million tonnes were used in recycling.

We are pleased to take part in this cycle, with durable and
recyclable products as a result.

”

Govaerts Recycling Team

Our story, your future

since 1995

We started our production in 1995 from scratch with no experience at all in the recycling sector.

But we learned fast and expanded fast from a single production unit into an extended machinery park. We could easily say that innovative ideas and a lot of guts brought us where we are standing now, being the market leader in the production of sustainable products in recycled plastic.

NL: Ons verhaal, uw toekomst

Bij de oprichting van Govaerts Recycling nv in 1995 hadden we helemaal geen ervaring in de recyclingsector. We leerden echter snel waardoor onze productie-eenheid al gauw uitgroeide tot een groot machinepark. Dankzij een mix van voortdurende vernieuwing en flink wat lef, zijn we vandaag marktleider in de productie van duurzame producten in gerecycled plastic.

FR: Notre histoire, votre futur

Partis d'une feuille blanche en 1995, sans aucune expérience du secteur du recyclage, nous sommes devenus leader du marché pour la fabrication de produits en plastique recyclé. Nous avons vite appris et nous sommes rapidement passés d'une seule unité de production à un parc étendu de machines. Quelques idées innovantes et un peu d'audace nous ont conduits là où nous sommes aujourd'hui, soit leader du secteur.

DE: Unsere Geschichte, Ihre Zukunft

1995 begannen wir unsere Produktion von Null und ohne jedwede Erfahrung im Recyclingsektor. Aber wir haben schnell gelernt und konnten uns rasch von einer einzelnen Produktionseinheit zu einem umfassenden Maschinenpark vergrößern. Innovative Ideen und viel Mut haben uns dahin gebracht, wo wir heute stehen: Marktführer bei der Produktion nachhaltiger Produkte aus recyceltem Kunststoff.

Values

Innovation

Govaerts Recycling always aims to be at the forefront of innovation when it comes to product development, design and manufacturing processes. We are constantly looking to meet our customer's needs and to adapt our products to the latest requirements.

Quality

Our products have been tested by independent specialists, with good results, emphasizing the importance to supply top quality. This is translated into a 10 year guarantee on the material.

NL: Innovatie

Govaplast wil een voortrekkersrol spelen op het vlak van innovatie. Wij ontwikkelen vernieuwende producten met een eigentijds design volgens de allernieuwste productieprocessen. Daarbij staan de veranderende wensen en behoeften van onze klanten steeds centraal.

Kwaliteit

Onze producten zijn stuk voor stuk getest door onafhankelijke vakspecialisten. De goede resultaten beklemtonen ons voortdurende streven naar hoogstaande kwaliteit. We hebben vertrouwen in onze producten. Daarom ook bieden we altijd tien jaar garantie op ons materiaal.

FR: Innovation

Govaplast désire toujours être à la pointe de l'innovation en matière de développement de produits, de design et de processus de fabrication. Nous cherchons en permanence à satisfaire vos besoins à adapter nos produits aux nouvelles exigences.

Qualité

Nous avons confié les tests de nos produits aux meilleurs spécialistes indépendants dans le souci d'une amélioration permanente de la qualité. Ces tests nous permettent de vous accorder une garantie de 10 ans sur le matériel.

DE: Innovation

Govaplast strebt danach, Innovationsführer bei Produktentwicklung, Design und Herstellungsprozessen zu sein. Wir wollen die Bedürfnisse unser Kunden immer erfüllen und passen unsere Produkte den Wünschen und Bedürfnissen an.

Qualität

Unsere Produkte wurden von unabhängigen Spezialisten mit guten Ergebnissen geprüft. Dabei zeigt sich wieder einmal, wie wichtig es ist, Spitzenqualität zu liefern. Dieses findet sich wieder in der Garantie von 10 Jahren auf das Material.

An everlasting vision

Cradle to cradle

The protection of the environment has always been our focal point. Govaplast wishes to play an active role in the entire recycling process, thus contributing to the protection of our eco system.

Our production process is a perfect example of the cradle-to-cradle philosophy: we use recycled material and our end products are 100% recyclable again. We use 'green' power and re-use our cooling-water, reducing our ecological footprint.

A sophisticated production process and the use of high-grade raw materials enables us to produce and supply high-quality products. The raw material consists of 100% plastic recycled material (PE and PP).

NL: Cradle to cradle

Govaplast wil van a tot z een actieve rol spelen in het recyclingproces, en op die manier bijdragen aan het behoud van ons ecosysteem.

Ons productieproces is een schoolvoorbeeld van de cradle-to-cradle-filosofie die wij hanteren. We gebruiken niet alleen gerecyclede materialen, ook onze eindproducten zijn opnieuw 100% recyclebaar. We gebruiken groene energie en hergebruiken ons koelwater om zo onze ecologische voetafdruk te verkleinen.

Dankzij ons geavanceerde productieproces en het gebruik van hoogwaardige grondstoffen kunnen wij producten van topkwaliteit maken en leveren. Onze grondstoffen bestaan voor 100% uit gerecycled plastic (PE en PP).

FR: Cradle to cradle

La protection de l'environnement est depuis toujours notre préoccupation principale. Govaplast a un rôle actif dans l'ensemble du processus de recyclage et l'entreprise contribue à la protection de notre planète. Pour y arriver, nous suivons la philosophie cradle to cradle, nous utilisons de la matière recyclée et nos produits finis sont, à leur tour, recyclables à 100 %.

Notre usine consomme de l'énergie « verte » et utilise l'eau de refroidissement en circuit fermé, réduisant ainsi notre empreinte écologique.

Le processus original de production et l'utilisation de matières premières d'excellente qualité fournissent des produits haut de gamme à base de 100 % de matières plastiques recyclées (PE et PP).

DE: Cradle to cradle

Der Schutz der Umwelt lag uns schon immer am Herzen. Govaplast will im gesamten Recyclingprozess eine aktive Rolle spielen und so zum Schutz unseres Ökosystems beitragen.

Unser Produktionsprozess ist ein perfektes Beispiel für die Cradle-to-Cradle-Philosophie: Wir verwenden recyceltes Material und unsere Endprodukte selbst sind auch wieder 100% recycelbar. Wir verwenden „grünen“ Strom und auch unser Kühlwasser wird wiederverwendet. So reduzieren wir unseren ökologischen Fußabdruck.

Ein anspruchsvoller Produktionsprozess und die Verwendung von hochwertigen Rohstoffen erlauben uns, qualitativ hochwertige Produkte herzustellen und zu liefern. Die Rohstoffe bestehen zu 100% aus recyceltem Kunststoffmaterial (PE und PP).
