

tabloo

The ensemble of lounge, shorty and tabloo has a clear and precise line and yet is strong and solid. With a vividness as light as a feather – cast in concrete.

The side table tabloo is functionally and structurally completing this trio. Made of thin walls it radiates the lightness of a bended sheet of paper, although it has the very same product features as all other pieces of furniture from the Concrete® Urban Design series of glass fibre concrete – timeless objects that people still will be fond of after years.

tabloo
Filigree side table of glass fibre concrete. It can be particularly well combined with the lounge and the shorty. Design options with high-class, natural colour pigments that are mixed into the matrix. The glass fibre concrete is not only supplied with a colour but is also imbued.

- Available colours**
- Dark-grey
 - Anthracite
 - Concrete-grey
 - Cream-white
